

Global Charging Pile Service Platform

Future-Oriented Clean Energy Solutions
Connecting Electric Mobility in Every Corner of the World

Deedian

MARKET OVERVIEW

The Global Electric Mobility Revolution

The EV market is experiencing explosive growth, driven by policy support and environmental goals. Charging infrastructure is now the critical bottleneck and opportunity.

2025 Market Size

Global EV Sales Growth Trend (2018-2025)

Key Market Drivers

-  Policy Support: 70+ countries phasing out ICE vehicles
-  Environmental Drive: 24% of emissions from transport
-  Cost Advantage: 60% lower usage cost vs ICE vehicles

PLATFORM VISION

OUR MISSION

Connect global charging pile resources through technological innovation. Provide seamless, intelligent, and sustainable energy supply services to drive transportation transformation in the clean energy era.

OUR VISION

To become the world's leading charging service platform. Build an open, intelligent, and interconnected ecosystem, making every electric trip convenient, reliable, and green.

CORE POSITIONING

 **Connector:** Linking operators, users, and partners.

 **Enabler:** Empowering digital operations & smart experiences.

 **Ecosystem:** Building a collaborative service network.

KEY VALUE PROPOSITIONS

Global Service

SERVICE MATRIX

Four core service sectors to fully meet the diverse needs of participants in the charging pile ecosystem.

01. Operator Solutions

One-stop digital platform to improve utilization, reduce costs, and expand exposure.

Intelligent Operation • Multi-channel Traffic • Revenue Optimization

02. User Services

Seamless, convenient, and smart charging experience for EV users.

One-Click Pile Finding • Frictionless Payment • Membership Benefits

03. Data Analytics

In-depth insights and decision support driven by big data and AI.

Market Insights • Operation Optimization • Intelligent Recommendations

04. Ecosystem Partnership

Building an open and win-win energy service ecosystem.

Automaker Collaboration • Energy Coordination • Scenario Integration

KEY REGIONAL LAYOUT

TECHNOLOGY INNOVATION

Empowered by AI, Big Data, and IoT to create an extremely intelligent charging service platform.

Intelligent Route Planning

AI algorithms recommend optimal charging plans based on real-time status, queue times, and pricing.

Real-Time Pile Status

24/7 IoT monitoring provides accurate and reliable information on availability, power, and fees.

Frictionless Payment

One-click start, automatic billing, and multiple payment options for a seamless checkout experience.

Big Data Analysis

Data-driven insights including user behavior analysis, demand forecasting, and site optimization for operators.

Safe & Reliable

Financial-grade encryption, 99.99% uptime, and 24/7 monitoring ensure platform stability and security.

Future Ready

Scalable architecture designed to integrate future technologies like V2G (Vehicle-to-Grid) seamlessly.

VALUE PROPOSITION (Operators)

Creating Core Value: Empowering operators to improve efficiency, expand market share, and maximize commercial value.

Equipment Utilization

+35% average improvement through platform traffic and intelligent scheduling.

Diversified Revenue

New profit models including service fee sharing, value-added services, and membership revenue.

Cost Optimization

-40% reduction via automation, predictive maintenance, and precision marketing.

Brand Exposure

Multi-scenario exposure across the platform to significantly enhance brand awareness.

Data Insights

In-depth analytics provide precise business insights for data-driven decision making.

Risk Control

Robust risk management system to ensure absolute fund security and compliance.

USER EXPERIENCE

Creating an Ultimate Experience: A user-centric design philosophy makes every charge simple, fast, and pleasant.

01. Before Departure

Intelligent route planning with charging recommendations and reservations.

02. Upon Arrival

One-click start charging with real-time progress tracking.

03. During Charging

Full intelligent monitoring with safety alerts and remote control.

04. After Completion

Seamless payment, e-invoice delivery, and history archiving.

Core Features

One-Click Pile Finding • Reservation • Multiple Payments • Real-Time Monitoring

Membership Benefits

30% Savings • Double Points • Priority Access

ECOSYSTEM PARTNERSHIP

Building an Open & Win-Win Energy Ecosystem — Work with upstream and downstream partners to build a collaborative charging service ecosystem.

Automakers

Seamless in-vehicle charging experience integration.

Energy Companies

Grid optimization, green energy trading, and demand response coordination.

Commercial Real Estate

Scenario integration to enhance property value and attract customers.

Navigation Platforms

API integration to enrich navigation services and increase user stickiness.
